To Whom It May Concern:

WellStar Health System, the largest healthcare system in Georgia, has been utilizing the services of MDS for approximately 10 years. The primary function of this relationship has been "second placements" and I must say that MDS has been an exemplary partner during these years of service.

As the Vice President of the Revenue Cycle, I highly recommend MDS for their secondary bad debt work. Given the opportunity, I feel certain that their other offerings, such as early out services, primary bad debt work, accounts receivable clean up and the like, would also be handled with the same intensity and professionalism that they offer for secondary placements.

I trust MDS and its leadership to continue to offer excellent services and customer service. You should too!

Lee Evins, MHSA, FHEMA

VP Revenue Cycle Management
